

How Well Do You Know the Eight Planets (Sorry, Pluto)

Your task is to identify correct facts about the planets to qualify to become a NASA astronaut. Find out how much you know about the planets by clicking on the correct information.

Which is the largest planet?
(according to Weight Watchers)

1. [Earth](#)
2. Saturn
3. Jupiter

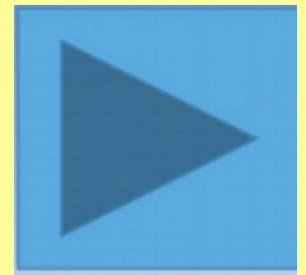

Sorry, Earth is not the largest planet, although it does have the largest amount of peanut butter. Please, try again by clicking on the arrow below.

Sorry, Saturn is not the largest planet, although it does have some remarkable rings. Please, click on the arrow below to try again.

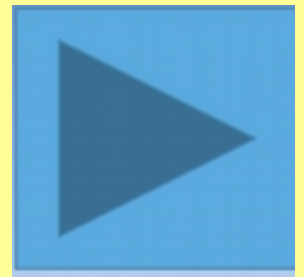

Correct, Jupiter is the largest planet and it's rightfully proud of being the largest planet, too. Click the arrow below to move to the next question.

Which planet is closet to the sun?

1. Uranus
2. Mercury
3. Venus

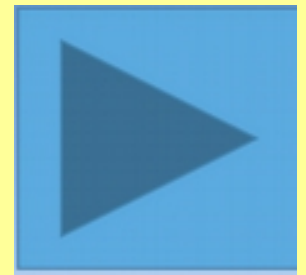

Sorry, Uranus is not the correct answer, but did you know that Uranus is referred to as the “ice giant” planet? Please, click on the arrow below to try again.

Sorry, Venus is not the correct answer, but oh what an amazing tennis player she is. Please, click on the arrow below to try again.

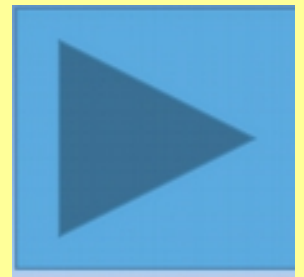

Correct, Mercury is the closet planet to the sun. If you visit, be sure to wear the strongest sunscreen, just like your mother always told you.

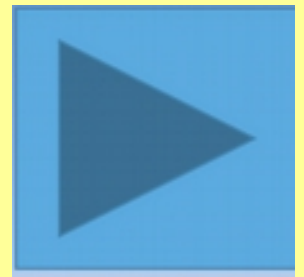

Which planet are people human beings planning to visit next?

1. Jupiter
2. Mars
3. Venus

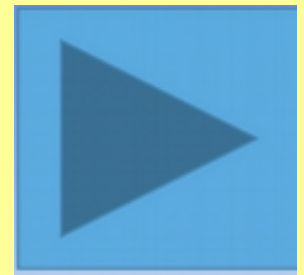

Sorry, Jupiter is not the correct answer. Please, click on the arrow below to try again.

Sorry, Venus is not the correct answer. Please, click on the arrow below to try again.

Correct! Mars is where human beings are planning to travel next. Would you like a one-way or a round-trip ticket?

Congratulations! You have qualified to become a NASA astronaut. All you need, now, is to obtain a PhD in science and obtain 40 years work experience.
